FACILITIES
RELIABILITY
SERVICE

MESKER Steel, Inc.

In selecting a dependable source for fabricated structural steel, consider Mesker Steel, Inc. Our reputation is built on service in steel since 1879.

Facilities include two plants, each completely equipped for efficient and accurate custom fabrication.

Reliability is assured by coordination of engineering and production and by thorough inspection under our quality control program.

Service is part of each job, from sales throughout engineering, production and delivery to meet your schedules.

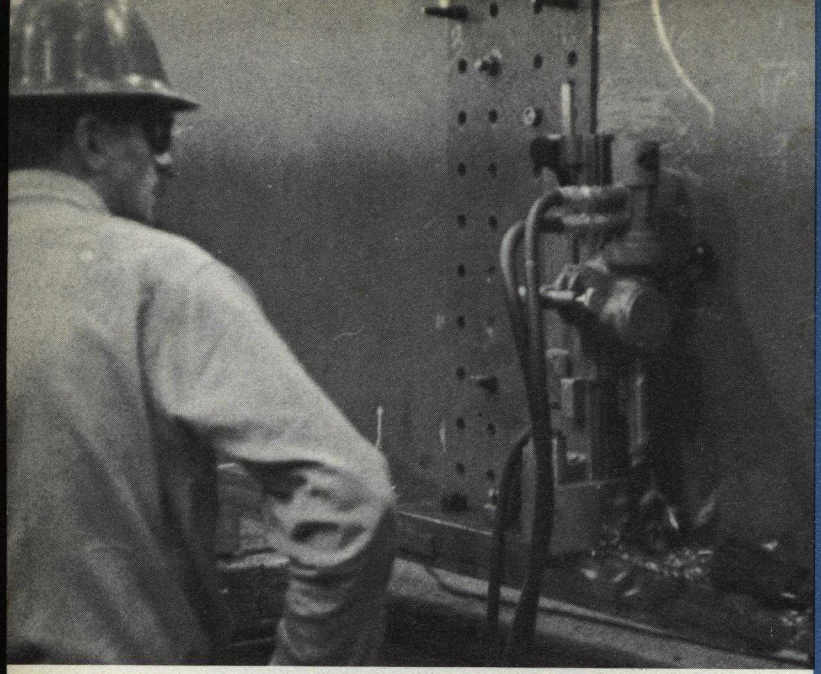
Mesker Steel is dedicated to economical production, accurately meeting your specifications and carefully observing delivery promises.

MESKER STEEL, INC., EVANSVILLE, INDIANA PLANT

PLANTS TO SERVE YOUR AREA

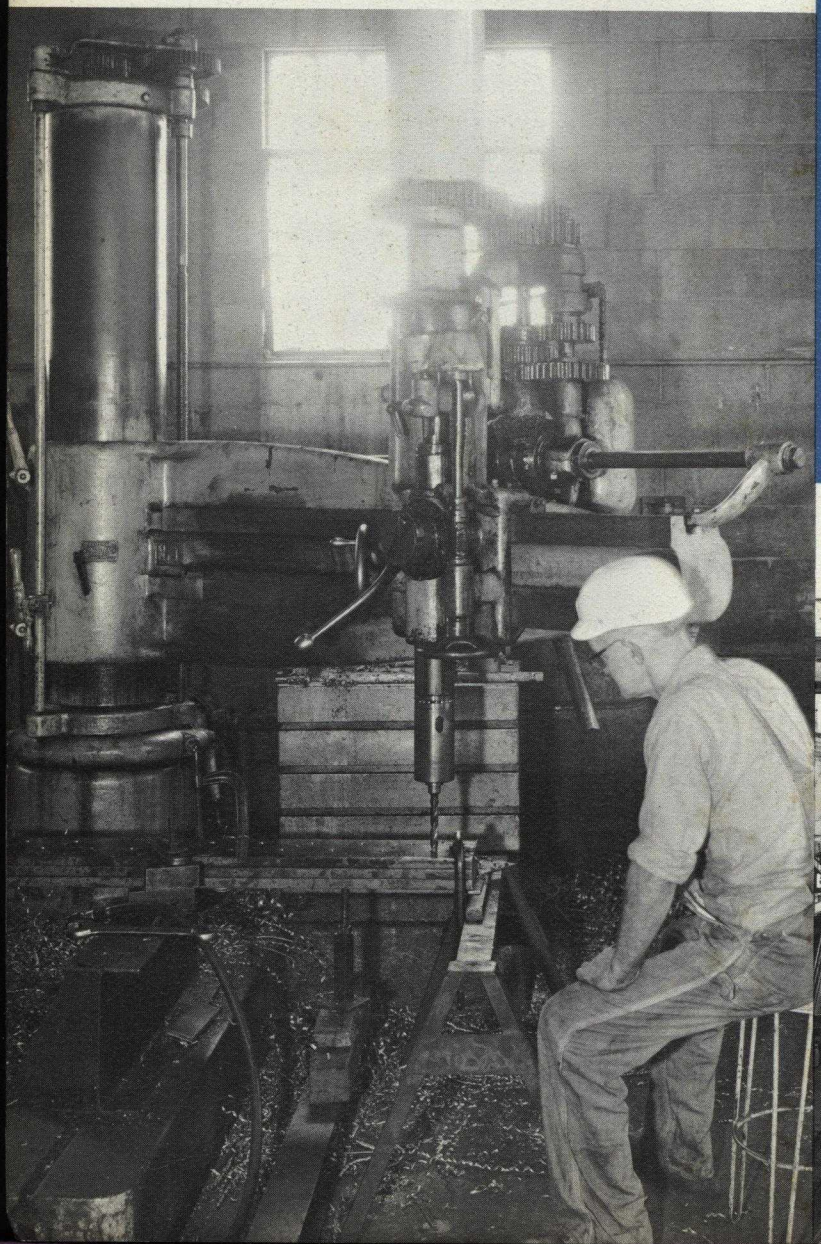
Both Plants have complete production facilities and have Sales and Service Staffs in addition to Production Personnel. Strategically located to shorten delivery distances, these plants can effectively serve a wide area. Since shop and job are closer and because specialized hauling equipment is available, larger prefabricated assemblies are now possible. This means reductions in cost to you and speedier erection.

MESKER STEEL, INC., NEW ALBANY, MISSISSIPPI PLANT



Portable hydraulic drill is able to reach normally inaccessible areas.

Radial drill bores components for special structural steel orders.



EQUIPMENT AND EXPERIENCED STAFF

The experience and knowledge of the Mesker Steel staff of engineers and production men are available to you. Utilize these people to augment your own organization. They can be called on to contribute their specialized abilities to the solution of your problems. Often they can suggest methods of reducing costs or expediting production.

Our materials handling and fabricating equipment make possible efficient production. Our methods assure accuracy and strict adherence to specifications. This attention to detail keeps our production competitive. More important, it also eliminates many costly delays and problems at the job site.

EXPEDITED SERVICE TO MEET YOUR NEEDS

Our specialized tractor-trailer fleet is designed to haul large and heavy sub-assemblies to the job. Railway shipments are loaded right in our own plant where electric overhead cranes speed the job. River barge shipments also are made where effective.

We maintain a large warehouse inventory of structural shapes and plates to eliminate delays in production.

Each job is expedited by our Production Control personnel who prepare material requisitions and schedule engineering, fabrication, and delivery to meet your requirements.
